PROFESSIONAL EXPERIENCE

REVSURE AI

Software Engineer

Bengaluru, KA

FEB 2025 - Present

- Architected and deployed production-grade agentic AI systems and the Reli conversational AI interface using React.js, TypeScript, and Python, enabling 500+ automated AI-driven workflows weekly.
- Built and scaled core AI orchestration modules including Agent Builder, Agent Execution Engine, Run History Tracking, Token Usage Analytics, and Tool Configuration systems, supporting monitoring and execution of large-scale multi-agent workflows.
- Developed autonomous AI agents for company research, lead intelligence, personalized outreach generation, campaign optimization, and real-time trigger-based automation, contributing to \$200K–\$300K in client contract value.
- Engineered full-stack AI integrations across Python and Golang services by designing 10+ scalable APIs connecting LLM workflows, backend systems, and frontend applications, improving response latency by ~10%.
- Designed a Marketing Mix Scenario Planner leveraging AI-assisted campaign simulation workflows to support GTM decision-making and ROI optimization.
- Improved platform scalability and frontend performance through shared component architecture and optimization initiatives, reducing production latency and resolving 300+ legacy issues.
- Collaborated cross-functionally with product, AI, and data stakeholders to translate business requirements into deployable AI solutions while mentoring junior engineers on AI platform development practices.

MEDLERN

Software Engineer

Software Engineer Intern

Bengaluru, KA

AUG 2022 - Feb 2025

MAY 2022 - JULY 2022

- Spearheaded the development of a cross-platform mobile and web application used by over 30,000 medical professionals, utilizing React.js and React Native, showcasing experience in building responsive, high-performance applications. Led the migration of 3 critical modules to modern tech stacks, reducing maintenance costs by 15%, improving system reliability, and ensuring alignment with agile project delivery frameworks. Coordinated with cross-functional teams to transition two major applications to new platforms, enhancing performance for over 10,000 end-users, ensuring seamless integration of RESTful APIs and Redux-managed state systems.

Awards: Fresher of the Year (2022-2023), Best Team Excellence Award

PERSONAL PROJECTS

- **ChatGPT AI Content Generator – MERN Stack (2023)**
Built an AI-powered content generation platform using OpenAI APIs with a React frontend and Node.js backend.
- **Creative Worldbuilding Platform - ViteJs, Golang, NodeJs, Python, MongoDB, PostgreSQL and Neo4J**
Building an AI-powered narrative creation platform for interconnected stories, characters, and multimedia worlds.

EDUCATION

MVJ COLLEGE OF ENGINEERING

Bachelor of Engineering in Electronics and Communication

Bengaluru, KA

2018-2022

ADDITIONAL INFORMATION

- **Technical Skills:** Python, TypeScript, JavaScript, Golang, React.js, React Native, Node.js, Express.js, REST APIs, Microservices, PostgreSQL, MongoDB, Mongoose, Zustand, Redux, Tailwind CSS, HTML/CSS, GCP, Git, GitHub, Jira, Claude Code, Cursor, GPT Codex
- **AI & LLM Technologies:** LLM Integration, Agentic AI Systems, Multi-Agent Workflows, Prompt Engineering, AI Automation, Retrieval-Augmented Generation (RAG), OpenAI APIs, AI Workflow Orchestration, AI Tooling Systems
- **Languages:** English, Malayalam, Kannada, Tamil, Hindi
